Contents:

1.1 Unreleased

1.1.1 Changed

- Required version of click package

1.2 0.6.0 - 2018-08-11

1.2.1 Added

- Possibility to truncate data in the database instead of the DB re-creation. `truncate` method in DB backends. #48
- Command Line Interface. #6

1.2.2 Changed

- Do not try to load schema if it is absent in the dump. #39
- `xdump.sqlite.SQLiteBackend` now accepts only `dbname` and `verbosity`. #52
- Now Django's `xload` command doesn't recreate the DB but provides a non required option `--cleanup-method` for choosing how to clean-up the database before the dump loading. #53
- Django's `xload` command options are renamed. `--dump_data` -> `--dump-data` and `--dump_schema` -> `--dump-schema`.

1.3 0.5.0 - 2018-08-02

1.3.1 Added

- Options to exclude schema or data from the dump. #29
- PyPy 2 & 3 and Python 2.7 support.

1.3.2 Changed

- SQLite < 3.8.3 is unsupported explicitly. `RuntimeError` is raised with unsupported SQLite version. #13
- Relation's data loading is optimized. #25
- Relation's query for PostgreSQL is optimized. #45
- An error is raised if a key from `partial_tables` is contained by `full_tables`. #44

1.4 0.4.0 - 2018-07-23

1.4.1 Added

- Dump compression level customization. #16
- Logging support. #15

1.4.2 Fixed

- Querying for relations by a read-only user in PostgreSQL. #21
- Constraint names were clashing on different tables. #22

1.5 0.3.1 - 2018-06-19

1.5.1 Fixed

- PostgreSQL search path issue.

1.6 0.3.0 - 2018-03-13

1.6.1 Added

- Support for Python 3.4 & 3.5. #7
- Automatic selection of related objects.

1.7 0.2.0 - 2018-01-07

1.7.1 Added

- SQLite support. #8

1.8 0.1.2 - 2018-01-03
